### About Us

Water Conservation Services, a division of SecureCoin, Inc., has been the leader in metered shower systems and timed-vend solutions for over ten years. In that time, WCS CashMaster and TouchMaster Metering Systems have helped Federal, state and private facilities across the U.S. save up to 70% in water and energy use in campground showers facilities, sports lighting systems, marina services, amusements and many other applications.

WCS began by working closely with the California Department of Parks and Recreation in the State's request for a metered shower program to help reduce water and energy use in State Campground facilities. Along with manufacturing and sales of metered shower systems, WCS installed, serviced and maintained metered shower systems in California State Park Campgrounds for 10 years. Through hands-on experience, WCS continued to develop and improve upon the safest and most reliable metered shower designs. WCS Metered Shower Systems have always utilized the most durable construction and most reliable components to save our customers *and us* costly maintenance time.

Since its inception, WCS has continuously added to the list of Federal and State agencies specifying CashMaster Metered Shower Systems as part of their conservation programs. Today, WCS' customers include the US Army Corps of Engineers, the US Forest Service, California State Parks, Colorado State Parks, Washington State Parks, Oklahoma State Parks and many others. In addition, WCS has provided the same conservation solutions to many private recreation facilities looking to offset costs and improve services.

Today's line of WCS Metering Controls are the most advanced and reliable available. All WCS systems utilize solid-state digital electronics and heavy-duty construction. WCS is the only manufacturer whose shower controls are approved and listed by Underwriter Laboratories (UL), the leader in U.S. product safety and certification. WCS has gone to this extra effort and expense to assure its customers that WCS products are safe and reliable.

WCS looks forward to helping more agencies and private facilities reduce costs and meet government mandates for water and energy conservation. WCS is a complete resource to help guide customers in designing and planning a water and energy conservation program. WCS has systems and solutions to fit the needs and budget of any size facility from the largest State Beach Campground in California to a small family-run marina and RV park in Maine.

# CashMaster Coin-Operated Shower System

CashMaster Metered Shower Systems from WCS are the quickest and most cost-effective way to make significant reductions to your water and energy bills. Many of our systems have brought our customers water and energy savings of up to 70% and paid for themselves in a matter of months. WCS has worked closely with government park agencies over the last 10 years to build a system that is rugged enough for the busiest campgrounds in the country. Whether you operate a small private campground in Maine with just a few showers or a State campground on the California Coast, we have a system designed to suit your needs and budget.

**CashMaster Controller Module**  
UL Listed

## WCS CashMaster

### Complete System Includes:

- CashMaster Controller Module
- Stainless Steel MeterBoxes
- High-Security Lock and Key Sets
- Reliable, Accurate Coin Acceptors
- Industrial Duty Solenoid Valves
- MeterBox Label Sets

**Vandal-Resistant MeterBoxes**  
12-gauge Stainless Steel  
3 models to suite your building requirements

**Industrial Duty Solenoid Valves**

**Reliable, Accurate Coin Acceptors**  
3 models to suite your security and coin requirements

**High-Security Lock and Key Sets**

## WCS CashMaster System 1, 2 and 3 Standard Components

### WCS CashMaster System 1

- CMCM-221 Controller, UL Listed
- CMMB-121 Surface Mount Meterbox
- CMCA-121 Mechanical Coin Acceptor
- CMSV-221 Solenoid Valve, UL Listed
- CMLS-MLS, HLS Camlock and Key Set
- Label Set per customer specification

### WCS CashMaster System 2

- CMCM-221 Controller, UL Listed
- CMMB-121 Surface Mount Meterbox
- EP-2 Electronic Coin Acceptor
- CMSV-221 Solenoid Valve, UL Listed
- CMLS-MLS, HLS Camlock and Key Set
- Label Set per customer specification

### WCS CashMaster System 3

- CMCM-321 Controller, Audit Capabilities, UL Listed
- CMMB-121 Surface Mount Meterbox
- EP-2 Electronic Coin Acceptor
- CMSV-221 Solenoid Valve, UL Listed
- CMLS-MLS, HLS Camlock and Key Set
- Label Set per customer specification

### Optional Components

- CMMB-221 Flush Mount Rear Access Meterbox
- CMMB-321 Flush Mount Front Access Meterbox
- CMCA-321 Electronic Programmable Multi-Coin Acceptor (Avail. with Sys 2 and Sys 3 only)

All WCS Systems are Underwriters Laboratories Listed, allowing their legal installation in public and private facilities where uniform building codes and OSHA workplace safety standards are enforced. U.L. Listing provides assurance that your facility users and maintenance staff are safe, and you are protected from liability. All WCS Systems are also Class II wiring and ADA (Americans with Disabilities Act) compliant when properly installed.

## CMCM-221, 321 CashMaster System Controller

### CMCM-221, 321

**The CashMaster Controller Module** is an industrial grade, purpose-built, UL Listed shower timing module. WCS is the only manufacturer of UL Listed metered shower controls - your assurance that our systems are safe for your customers and employees. Each controller can operate up to four showers. Controllers are provided with each CashMaster system according to the customer's facility requirements.

#### Standard Features:

- Environmentally-resistant enclosure box, high humidity and temp. rated
- CashMaster 4-in-1 Timer programs easily for number of coins to start and time per coin
- Integrated Ground-Fault Circuit Interrupter (GFCI)
- 110-24VAC Transformer
- Solid-state circuit board with current protection fuses
- Convenient status indicator LED lights
- Manual override switches for easy testing and maintenance
- Accounting features/non-resettable counters (System 3, only)
- Complete Electrical Control Panel UL Listed

## CMMB-121, 221, 321 MeterBox Options

CashMaster MeterBoxes by WCS are manufactured of super heavy duty 12-gauge 304 stainless steel. Individual parts and cutouts are laser cut for close tolerance. Precise fit and full seam welding (not spot or tack welded) results in quality appearance and superior vandal resistance. Large reinforced cash vault holds 500 coins allowing more time between collections than smaller boxes. Each Meterbox comes with professional quality high security locksets with proprietary key codes. Locks may be keyed the same or individually as specified by customer. All CashMaster Systems include MeterBox label sets as specified by the customer. Meterboxes measure approx. 15.75" height x 4.25" width x 5.75" depth. *(Please see CashMaster Installation Manual for exact measurements and installation instructions).*

### **CMMB-121** **Surface Mount Meterbox**

- Comes standard with all CashMaster Systems
- Bolts to wall surface
- Ideal for simple retrofit of existing shower buildings

ref. WCS doc. 700003r2 for specifications

### **CMMB-221** **Flush Mount Rear Access Meterbox**

- Available as an option with all CashMaster Systems
- Installs flush to wall surface
- Coin vault and coin acceptor are accessed from rear
- Coins can be collected from secure room behind showers
- Shower building can remain open during coin collections

ref. WCS doc. 700002r2 for specifications

### **CMMB-321** **Flush Mount Front Access Meterbox**

- Available as an option with all CashMaster Systems
- Installs flush to wall surface
- Coin vault and coin acceptor are accessed from front
- Ideal for facilities with limited space and no rear access

ref. WCS doc. 700001r2 for specifications

## CMCA-121, EP2, EP5 Coin Acceptor Options

CashMaster Coin Operated shower systems feature the most durable and reliable coin acceptors available. All WCS Coin Acceptors are made of high-impact, non-corrosive plastic and stainless steel. All electronics and sensors are waterproof to allow for reliable service in wet environments. Several options are available to allow for multiple coins or tokens.

### CMCA-121 Mechanical Coin/Token Acceptor

- Comes standard with CashMaster System 1
  - Reliable mechanical evaluation of each coin
  - Manual coin return easily clears coin path, simplifying maintenance
  - Low voltage operation (24VAC)
- ref. WCS doc. 300001r4 for specifications

### EP2 Electronic Coin Acceptor

- Comes standard with CashMaster System 2 and 3
  - Precise electronic coin identification, slug rejection
  - Accepts US quarter and dollar coin
  - Waterproof construction
  - Low voltage operation (24VAC)
- ref WCS doc. 300002r5 for specifications

### EP5 Electronic Programmable Multi-Coin Acceptor

- Available as an option with CashMaster System 2 and 3
  - Precise electronic coin identification, slug rejection
  - Pre-programmed for US quarter and dollar coin
  - Learns 3 additional tokens or coins of your choice
  - Simple touchpad programming and LED display
  - Waterproof construction
  - Low voltage operation (24VAC)
  - Will not lose program in power outage
- ref WCS doc. 300003r4 for specifications

# CMSV-221 CashMaster Solenoid Actuated Water Flow Control Valve

## Solenoid Actuated Water Flow Control Valve

- Compact construction for confined installations
- Industrial Duty: High reliability
- Low Voltage (24VAC)
- Built-in sediment strainer
- Stainless steel seat
- Brass Valve Body - CMSV-221
- Celcon Valve Body - CMSV-121
- Standard electrical installation
- Molded, waterproof coil
- UL Listed
- Rebuildable
- Class II wiring compliant\*

### Operates with:

Controllers:  
CMCM -221, 321

\*when properly installed using CM SYSTEM 1, 2, or 3 components

## Description

The CMSV-221 is used in the CASHMASTER SERIES COIN-OPERATED SHOWER SYSTEMS to control the flow of water from source to shower head. Depending on plumbing layout, it may be installed before or after mixing valves, on either or both the hot and cold water supplies. In tempered, recirculating water supplies a single solenoid valve is required and may replace manual valves completely in a valveless automated system.

PART NO.	DESCRIPTION
41-1-8	KICK OFF SPRING
41-7-25	ENCLOSING TUBE (STAINLESS)
41-9-5	SOLENOID COIL
41-10-11	PLUNGER
41-15-5	DIAPHRAM
41-34	SPACER RING
41-36-1	STRAINER SCREEN
41-37	FLANGE
41-41	NYLON WASHER
41-59-1	VALVE BODY (P442)
41-59-2	VALVE BODY (P 443)
41-59-3	VALVE BODY (PP 442)
41-59-4	VALVE BODY (PP 443)
41-60	SCREEN CAP (P442-P443)
41-61	SCREEN CAP (PP442-PP443)
41-62-1	SCREW #8-18 X 1/2 LG. (2 REQ'D.)
41-62-2	SCREW #8-18 X 3/8 LG. (1 REQ'D.)

## Component Specifications

- Pipe Size N.P.T 3/8"\*
- Conduit Attachment 3/8"
- Energized Position: Open
- Valve Body: Brass
- Description: Diaphragm Type, Remote Actuation
- \*1/2" adapters available

## Operating Specifications

- 24VAC/50-60Hz
- Ambient Temp. Max: 170F
- Water Temp. Max: 250F
- Max Operating Pressure: 125psi
- Load: 10VA

## AC1002, AC1005 Bill Changers

### Description

The AC1002 and AC1005 high-security bill to coin changer machines are an excellent addition to any facility with coin-operated showers or vending. A coin changer can pay for its self in a matter of months through labor-cost savings and improved security. AC1002 and AC1005 changers are constructed of heavy-gauge steel and include reliable bill validators and coin dispensors.

### AC1002 Front-Load Changer

### Dispensing Capacities

Can dispense one of the following:

- Dollar Coins (2,200)
- Quarters (2,800)
- Tokens (2,800) 20mm-30mm

Validator Acceptance: \$1, \$2, \$5, \$10, \$20

Validator Capacity: 500 Bills

Token Bonus Payout: 1 Option Available

### Available Options

- Security Alarm
- Audit Printer
- Dollar Coin Acceptor
- Optional Capacity (stacker): 650 Bills

### Warranty

1 Year

2 Years on Validator

**UL Listed**

### AC1005 Rear-Load Changer

# Complete Water and Energy Efficiency Other Products Available from WCS

## TouchMaster System II

**TouchMaster II by WCS** is the Industry Leading Touch Actuated Metered Shower System. The TouchMaster offers a safe, reliable and field proven solution for facilities where water and energy saving advantages of metered showers are required but coin operation is not appropriate. The TouchMaster features the same rugged components as the CashMaster Systems, including the UL Listed Controller Module. Showers are activated by an easy-to-install, water-tight touch button module in each shower.

**AC1002 and AC 1005 Bill to Coin Changers** are an excellent addition to any facility with coin-operated showers or vending. These changers are constructed of heavy-gauge steel and come in front or rear-access models.

**AC1002 Front-Load Changer**

**AC1005 Rear-Load Changer**

### HBL-01 Anti-Scald Mixing Valve

Attractive institutional quality mixing valve combined with the important safety features of an anti-scald mixing valve.

**HB8000C Flush Valve**

**1000C Automatic Faucet**

**H9000 Automatic Shower**

### HBL02 Anti-Scald Thermostatic Mixing Valve

Important safety measure for public shower facilities. Adjustable valve limits maximum temperature of shower water. Can be installed at water heater or at individual showers.

### Automatic Faucets and Shower Systems

Featuring advanced no-touch operation, these automatic faucets, flush valves and shower systems are an excellent way to improve conservation and hygiene in any shower/restroom facility.
